

FONTAINE ARMOR

Special features with part replacement from top side mean the lowest total cost of ownership!

Components do not extend beyond top plate (helps shield against trailer kingpin damage)

Composite air cylinder resists corrosion for greater durability and longer life

Robust wear pads are replaceable to further extend product life cycle

Knockout rod provides ability to un-seize wheel (if necessary)

Locking jaw replacement from top side cuts repair time from three hours to as little as 15 minutes since there is no need to remove the fifth wheel from the chassis

Anti-high-hitch feature helps prevent dropped trailers due to false coupling
