Ultra NT Product Differentiation

The Fontaine® Ultra NT offers the benefits of a lightweight fifth wheel assembly (when coupled to an appropriate lower assembly, i.e. LWO) and incorporates the familiar Fontaine No-Slack® locking mechanism.

The Ultra NT top plate and the 6000 series top plate can appear similar upon first glance. Although the model number tag on the back of the fifth wheel will indicate which fifth wheel you have, we have added a plate at the below specified location. Note: the plate should be installed on the pull handle side of the fifth wheel.

**This is a Fontaine
Ultra NT
Fifth Wheel**
Refer to Instruction
Handbook LT-169 for
