Fontaine now offers a **bolt kit to make your installation EASY!**

NEW!

KIT-BOLT-24
Quantity 20

Kit has all nuts, bolts and washers you need to install any Fontaine 24" sliding mount to the truck chassis. Same kit can be used for fixed mounts. (includes 20 Grade 8 bolts with matching locknuts and 40 hardened washers).

FONTAINE NO-SLACK®

How No-Slack® Works:

As the **KINGPIN** moves into the throat of the fifth wheel, the **JAW** slides into place making contact with the kingpin. Then the **WEDGE** presses against the jaw to automatically remove any slack between the kingpin and the jaw. This design is only available from Fontaine. See it for yourself here: www.fifthwheel.com/no-slack

Kingpin

Jaw

Wedge

What No-Slack® means for you:

- Superior fifth wheel technology that self-adjusts for kingpin wear to give you a snug, secure connection
- Switch from trailer to trailer hassle-free
- Reduces shock inputs into the frame when braking and accelerating
- Drivers love the smoother ride and the easy-to-pull handle
- Extends the life of components and reduces maintenance costs
- The industries best defence against false coupling
- Only available from Fontaine

Now you can run with the best for less.
